SANGHARSH SINGH YADAV

Lucknow, Uttar Pradesh, 226028 | Phone: +91 95069 86826 | Email: singhsangharshy95@gmail.com
LinkedIn | GitHub | Portfolio

TECHNICAL SKILLS

Languages:	Java, Python, C, SQL (MySQL), JavaScript
Frameworks:	React.js, Node.js, Express.js, Tailwind CSS
Developer Tools:	Git/GitHub, VS Code, LinkedIn, Replit
Core Subjects:	Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

TECHNICAL PROJECTS

AI-Powered Resume ATS Analyzer — GitHub Repo

Tech Stack: Node.js, React.js, MongoDB, PDF.js, Express

- Engineered a full-stack tool to parse and score resumes against job descriptions, using Regex-based extraction to improve data accuracy by 35%.
- Architected a modular backend featuring Roadmap Generation logic to suggest missing skills to users based on industry role templates.
- Implemented a custom ATS Scoring Algorithm that evaluates keyword density, formatting, and section relevance.

Secure Video Authenticator — GitHub Repo

Tech Stack: Python, Django, SQLite3, HTML5, CSS3

- MVT Framework Implementation: Developed a secure media platform using the Django framework, featuring a centralized video auth configuration and a specialized videos application for media logic.
- **Secure Authentication Flow:** Engineered custom backend views and templates, including login.html and base.html, to manage user sessions and enforce media access control.
- Media Management System: Architected asynchronous upload and retrieval workflows with **video_upload.html** and **video_list.html,** ensuring data persistence via models.py and db.sqlite3.

Food Delivery Web Application — GitHub Repo

Tech Stack: MongoDB, Express.js, React.js, Node.js, HTML5, CSS3

- MERN Framework Implementation: Developed a full-stack food delivery platform using the MERN stack, featuring a modular React frontend and Node.js/Express backend for scalable application architecture.
- **Secure Authentication Flow:** Implemented **JWT-based authentication** using middleware (auth.js) to manage user sessions and protect routes.
- RESTful API Development: Built structured APIs using userRoute.js, foodRoute.js, cartRoute.js, and orderRoute.js to handle core business logic.
- Dynamic UI & State Management: Designed responsive components like Navbar, Sidebar, and FoodDisplay with global state handling using Context API (StoreContext.jsx).
- Database & Media Handling: Modeled data using MongoDB schemas (userModel.js, foodModel.js, orderModel.js) and implemented image upload functionality via the uploads/ directory.

EDUCATION

Bachelor of Technology in Computer Science — 2023 -2027 (Expected)

Dr. A.P.J. Abdul Kalam Technical University, Uttar Pradesh, Lucknow. — *CGPA: 7.67/10.0*

ACHIEVEMENTS & LEADERSHIP

- AWS Solutions Architecture Job Simulation
- Accenture Nordics Software Engineering Job Simulation
- J.P Morgan – Software Engineering Job Simulation
- Accenture UK Introduction to Technology Apprenticeship Job Simulation
- Deloitte Australia Technology Job Simulation
- Tata – GenAI Powered Data Analytics Job Simulation
- Leadership: Technical Coordinator for the College Tech Fest, managing a team of 15 student volunteers.
