SUMMARY

Highly motivated **Computer Science student** (graduating 2027) with a strong foundation in **full-stack development** and **backend architecture**. Passionate about building scalable web applications and APIs using the **MERN stack**, **Python/Django**, and **Docker**. Backed by comprehensive knowledge of **data structures and algorithms**, with hands-on project experience in designing responsive, user-centric platforms and solving complex technical challenges.

PROJECTS

Food Delivery Web Application - MealMitra | MongoDB, Express.js, React.js, Node.js Jan 2026 – Mar 2026 | [GitHub Repo](#)

- Developed a full-stack food delivery platform using the **MERN stack**, featuring a modular React frontend and scalable Node.js/Express backend.
- Implemented **JWT-based authentication** and built structured **RESTful APIs** to handle core business logic and protect routes.
- Designed responsive components with global state handling using **Context API** and modeled data using **MongoDB schemas** with image upload functionality.

Smart Leads Management Dashboard | TypeScript, React.js, Node.js, MongoDB, Docker Jul 2025 – Sep 2025 | [GitHub Repo](#)

- Engineered a production-ready, full-stack CRM application featuring a secure **JWT authentication** flow with strict **Role-Based Access Control (RBAC)**.
- Integrated robust data validation workflows using **Zod schemas** across both client and server, and implemented direct-to-CSV data export functionality.
- Designed a responsive, dark-mode supported UI using **Tailwind CSS** and containerized the entire infrastructure using **Docker** for seamless deployment.

Secure Video Authenticator | Python, Django, SQLite3, HTML5, CSS3 Jan 2025 – Mar 2025 | [GitHub Repo](#)

- Developed a secure media platform using the **Django framework**, featuring a centralized video auth configuration and a specialized videos application.
- Engineered custom backend views and templates to manage user sessions and enforce **media access control**.
- Architected asynchronous upload and retrieval workflows, ensuring data persistence via **models.py** and **db.sqlite3**.

AI-Powered Resume ATS Analyzer | Node.js, React.js, MongoDB, PDF.js, Express Sep 2024 – Oct 2024 | [GitHub Repo](#)

- Engineered a full-stack tool to parse and score resumes against job descriptions, using Regex-based extraction to improve data accuracy by **35%**.
- Architected a modular backend featuring Roadmap Generation logic to suggest missing skills to users based on industry role templates.
- Implemented a custom ATS Scoring Algorithm that evaluates **keyword density**, **formatting**, and **section relevance**.

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, SQL

Frameworks & Libraries: MERN Stack (MongoDB, Express.js, React.js, Node.js), Tailwind CSS, Django

Databases: MongoDB, MySQL, SQLite3

Developer Tools: Git, GitHub, VS Code, Docker, Postman

Core Subjects: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS

Job Simulations: Completed virtual enterprise experiences with **AWS** (Solutions Architecture), **Accenture** (Software Engineering), **J.P Morgan**, **Deloitte**, and **Tata** (GenAI Analytics).

Leadership: Served as **Technical Coordinator** for the College Tech Fest, managing and guiding a team of **15 student volunteers**.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology in Computer Science; CGPA: 7.67/10.0

Lucknow, Uttar Pradesh

2023 – 2027 (Expected)

Narayani Challenger Convent School

Intermediate (12th Grade)

Varanasi, Uttar Pradesh

2023

Subhash Chandra Academy Chakarma

High School (10th Grade)

Varanasi, Uttar Pradesh

2021
